```

A mind map diagram for 'DPQ2-15 Search Bar'. The central node is a purple rounded rectangle labeled 'DPQ2-15 Search Bar'. It branches into three main categories: 'Main Scenarios' (blue rounded rectangle), 'Risks' (red rounded rectangle), and 'Tests' (green rounded rectangle). 'Main Scenarios' branches into two light blue rectangular boxes: 'Make sure the search bar is clickable and the user can type the query and press "enter" on the keyboard, or the magnifying glass on the right of the search bar' and 'Make sure the product's results are shown according to the search query'. 'Risks' branches into five light red rectangular boxes: 'Search bar not clickable', 'User is not able to type the query inside the search bar', 'Pressing "Enter" shows no action', 'Clicking the magnifying glass shows no action', and 'The products shown are not the ones of the query'. 'Tests' branches into two light green rectangular boxes: 'Functional tests with UI/UX' and 'API tests'. 'API tests' further branches into a light green rectangular box: 'To assure the query is answered and all interactive elements of the page show actions'.

Main Scenarios

Make sure the search bar is clickable and the user can type the query and press "enter" on the keyboard, or the magnifying glass on the right of the search bar

Make sure the product's results are shown according to the search query

Risks

Search bar not clickable

User is not able to type the query inside the search bar

Pressing "Enter" shows no action

Clicking the magnifying glass shows no action

The products shown are not the ones of the query

Tests

Functional tests with UI/UX

API tests

To assure the query is answered and all interactive elements of the page show actions
